Jeff,

As of last Thursday (8/23) when I was out there for the monitoring (accompanied by Stephen Fishbach for part of the time) , they had completed repairs on the sinkhole at the elementary school, had poured the new concrete sidewalks and ramps at the middle school, and had completed all work except for laying asphalt in the courtyard area and the walkways around the middle school. The areas where the asphalt was going to be laid were graded and covered with at least two feet of soil. Fill had been placed in the area around the transformer behind the middle school. I have attached some photographs showing the status on 8/23/07.

I will have someone go out there and check to make sure the asphalt has been laid, and take pictures of the final Site conditions, then I will send you a brief letter summarizing that repairs have been completed. I also have photos that I will include of the work as it progressed.
