RE: Site Response Action Status Report – August 1 through August 31, 2015
Former Tidewater Facility
Pawtucket, Rhode Island
RIDEM Case No. 95-022

The following summarizes response actions completed at the above-referenced site for the period August 1, 2015 through August 31, 2015, as well as planned activities.

SITE ACTIVITIES PERFORMED

- Performed Site visits to document security conditions and sheen observations, if present.
- Completed demolition activities associated with three on-Site buildings (the former machine shop, purifier house and the meter room) in August 2015. Air monitoring, consistent with the site-specific, Rhode Island Department of Environmental Management (RIDEM)-approved Air Quality Monitoring Plan, was performed throughout the work and no elevated levels of dust or VOCs were detected at the fence-line. Results of the air monitoring are available on the National Grid Tidewater website (www.tidewatersite.com).

FUTURE RESPONSE ACTION WORK/SCHEDULE

- It is anticipated that a letter summarizing the quarterly soil gas sampling results at SG-105S will be submitted to RIDEM in September 2015.
- Continue quarterly groundwater and NAPL gauging and recovery. The next event is scheduled for October 2015 and will include the annual groundwater monitoring round.
- Continue Site visits to document security conditions and sheen observations.

Please call me if you have any questions at 401-421-4140 Ext. 2719 or Michele Leone at 401-784-7337.
