MEMORANDUM

To: Joseph Martella, RIDEM

From: Dave Rusczyk, GZA
Jim Clark, GZA

CC: Kenneth Lento, National Grid

Date: November 17, 2020

Re: Upcoming Site Response Action Report
Period November 16, 2020 through November 29, 2020
Former Tidewater Facility
Pawtucket, Rhode Island
RIDEM Case No. 95-022 / Site Remediation File No. SR-26-0934

SITE ACTIVITIES TO BE PERFORMED

- Continued performance of a background turbidity monitoring program of the Seekonk River.
- Implementation of upgrades to the perimeter fencing on the north side of the Site.
- We anticipate that BETA, on behalf of the Narragansett Bay Commission, will be performing a test boring and test pits at the Site to further the design of the relocated Combined Sewer Overflow outfall within the timeframe covered by this report.
- We anticipate the temporary electrical services for the perimeter air monitoring system to be used during the remedial construction will be installed within the timeframe covered by this report.
- Fortuitous Partners will be performing a drilling exploration program in the northern portion of the Site to collect geotechnical information for the potential soccer stadium starting the week of November 16, 2020.
- We anticipate the contractor performing the first three phases of the remedial work will mobilize to the Site the week of November 23, 2020.

Please contact Kenneth Lento at 781-907-3655 if you have any questions or comments.
