Re: Notification of Maintenance and Repair Project
642 Allens Avenue
Providence, Rhode Island
RIDEM Case No. 98-004 / Site Remediation File No. SR-28-1152

Dear Mr. Martella:

GZA GeoEnvironmental, Inc. (GZA), on behalf of The Narragansett Electric Company d/b/a National Grid (National Grid), has prepared this letter to notify the RIDEM Office of Waste Management of an upcoming maintenance and repair project associated with critical facility infrastructure at the 642 Allens Avenue property located in Providence, Rhode Island (herein referred to as the Site), in accordance with the September 2012 *Soil Management Plan* (2012 *SMP*).

The maintenance and repair project will be performed in accordance with the existing 2012 *SMP*. The following maintenance and repair project is currently scheduled for the facility:

- Junction box support installation (expected to begin in Fall/Winter 2019).

The location of the project is shown on the attached Figure 1, *Aerial Site Plan*.

The work involved in the project is necessary to maintain day-to-day operations at the Site. The work will include soil and groundwater activities that are not subject to the June 2017 *Public Involvement Plan (PIP)*. As detailed in Section 1.1 of the *PIP*, the *PIP* does not apply to work necessary to maintain day-to-day operations at existing facilities or facility emergencies, including repairs and maintenance of the natural gas regulating facility, compressed natural gas fueling station, liquefied natural gas facility, and cement distribution facility, or for projects involving minor soil disturbances only (e.g. utility work, installation of fence posts, etc.).

The area involving this project will have a RIDEM-approved engineered cap consistent with the 2012 *SMP*. In addition, real-time work area perimeter air monitoring will be performed consistent with a Site-specific Health and Safety Plan and the 2012 *SMP*. The above project is not related to the liquefaction project.

This maintenance and repair project will be documented in accordance with the 2012 *SMP* in an annual summary report that will be submitted to RIDEM.

If you would like more information or have any questions, please contact the undersigned or Amy Willoughby of National Grid at 781-907-3644.

Very truly yours,

GZA GEOENVIRONMENTAL, INC.
