## Barrier Wall and Engineered Caps

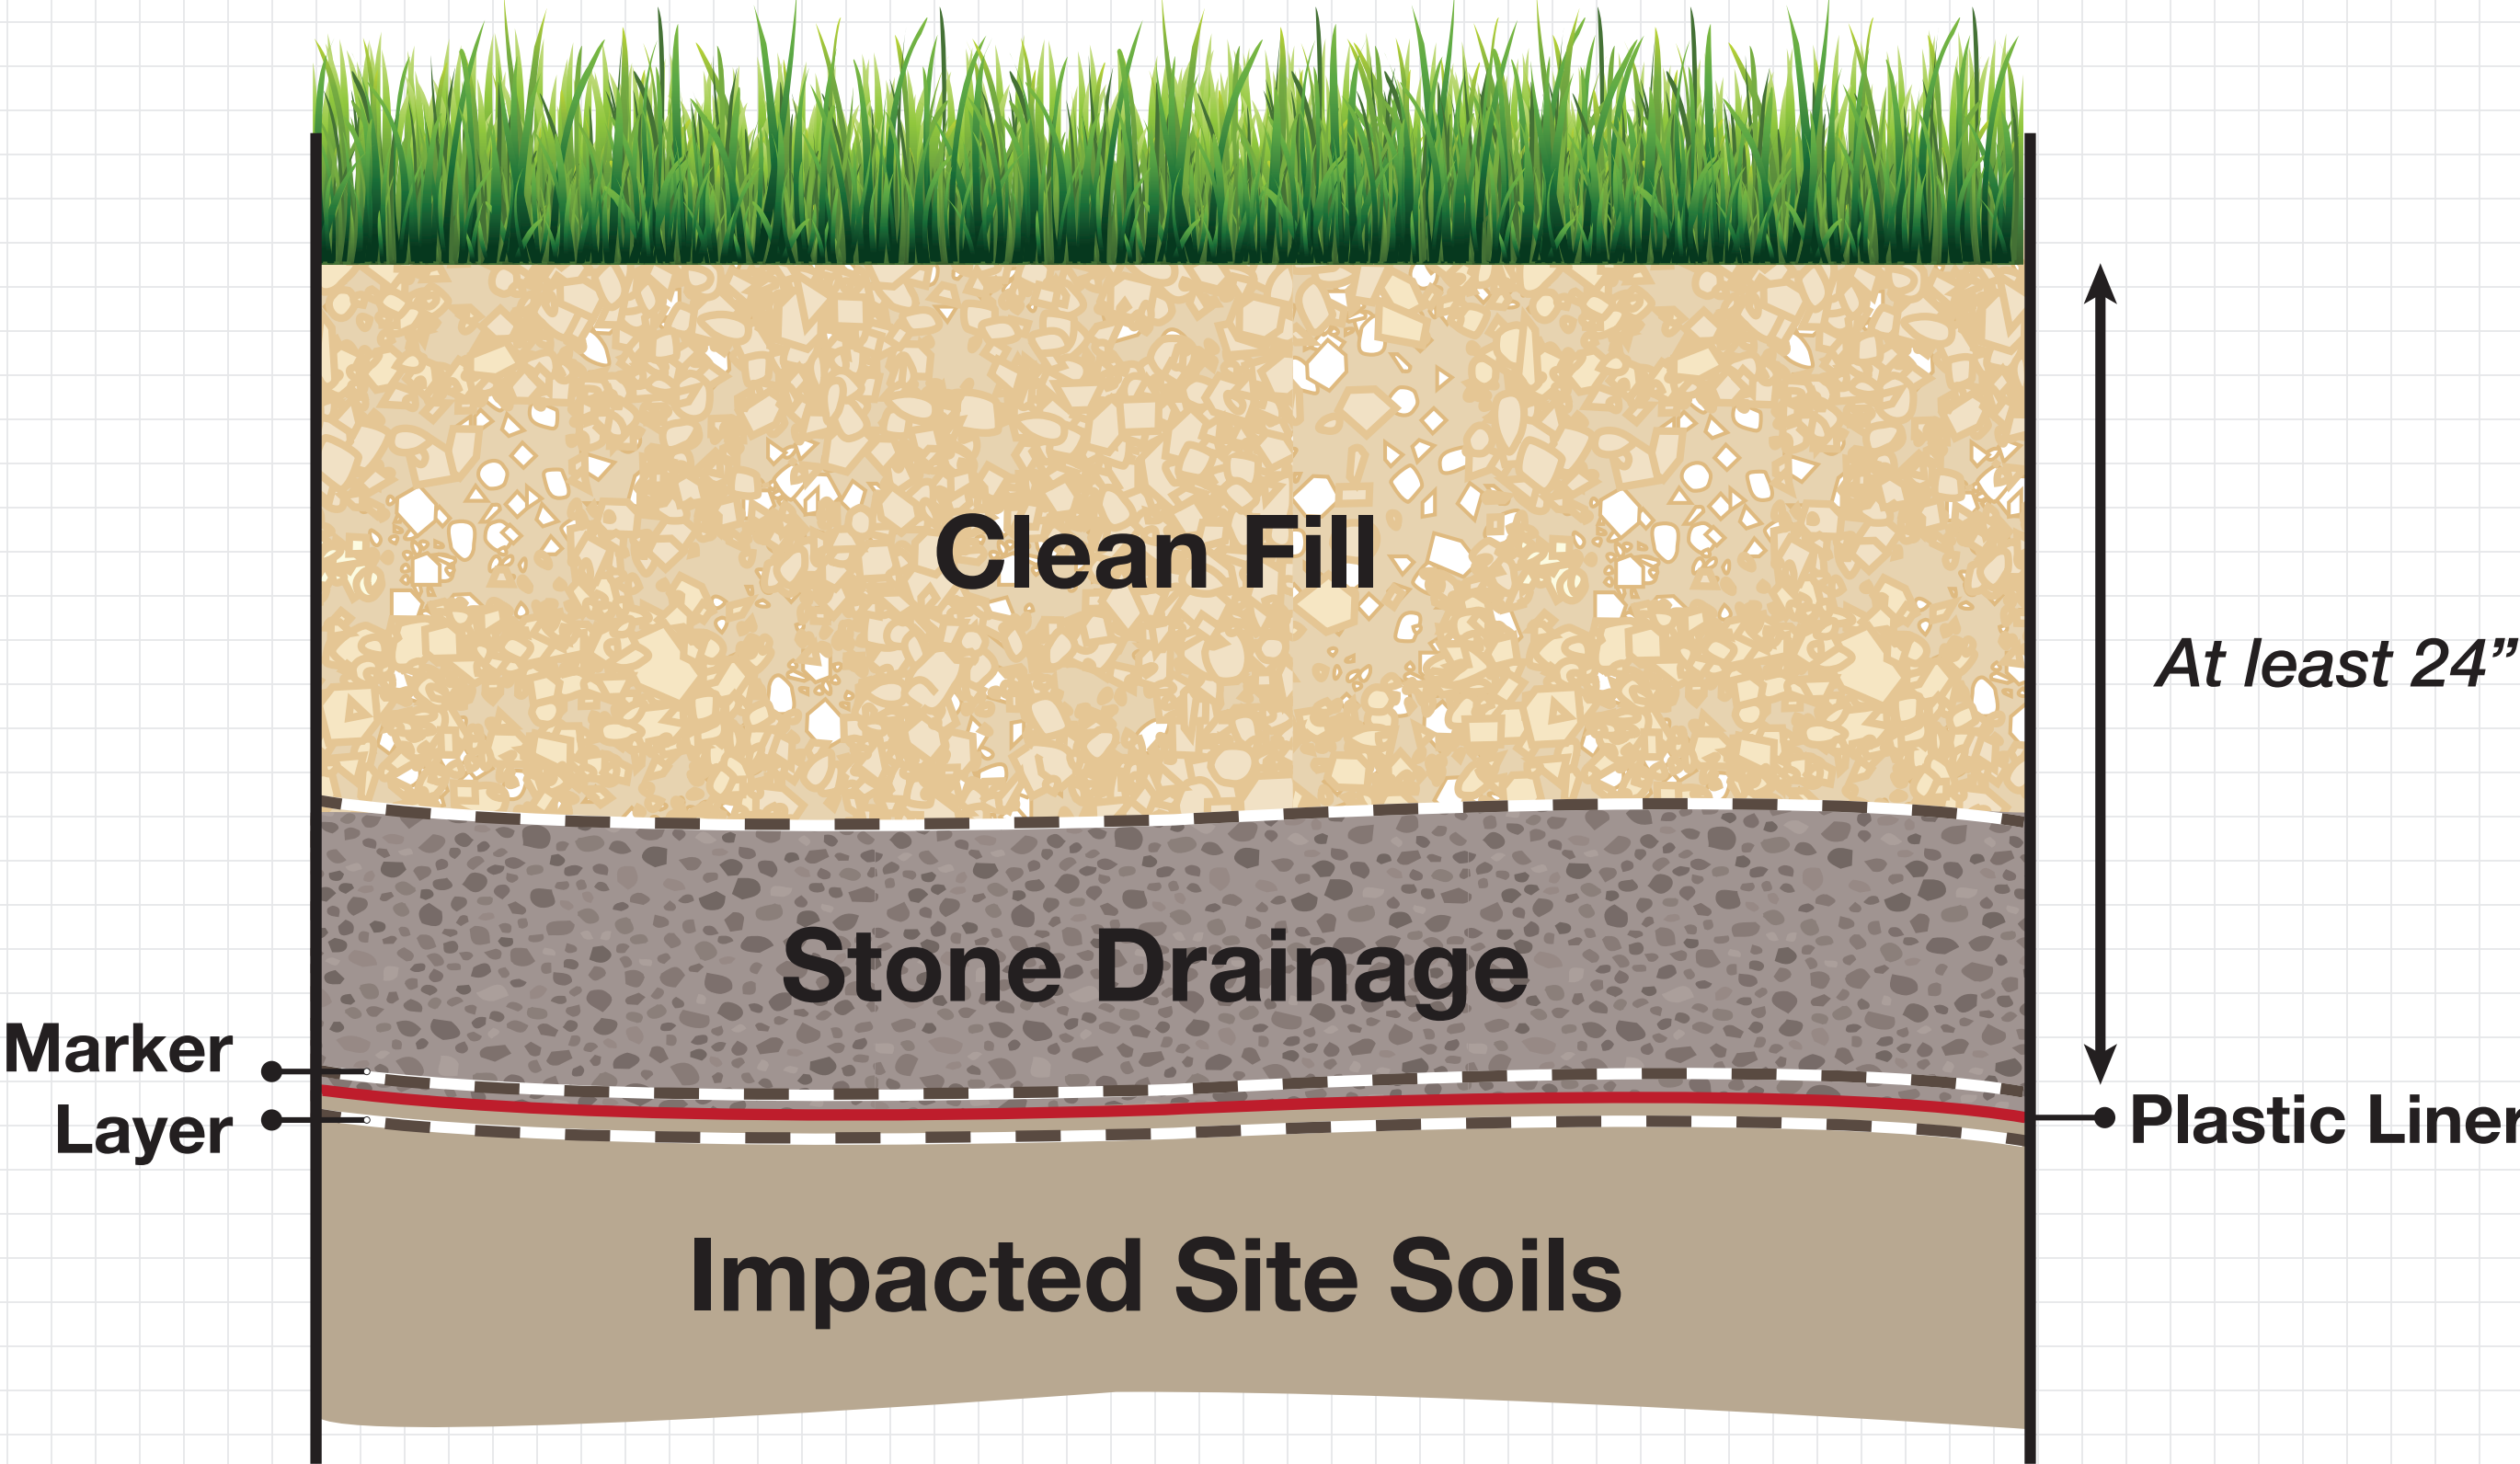

### Barrier Wall

### Permeable Caps

### Impermeable Cap

REMEDIAL COMPONENT	PURPOSE
Site-wide Engineered Soil Cap	Prevents direct contact with impacted soils Prevents potential offsite tracking of impacted soils Prevents potential erosion/runoff of impacted soils
Removal of Impacts and Impermeable Soil Cap	Prevents potential for continued degradation of groundwater quality
Barrier Wall	Prevents potential migration of impacted groundwater and non-aqueous phase liquids (NAPLs)
