On behalf of National Grid, the following summarizes response actions to be performed at the above-referenced site during the timeframe from July 8 to 12, 2013.

SITE ACTIVITIES TO BE PERFORMED

- Complete site observation walk.
- Installation of soil gas probes associated with soil gas quality survey.

The soil gas quality survey will be performed in accordance with the Supplemental Site Investigation Work Plan (SSIWP) which was submitted to RIDEM on May 2, 2013. During the soil gas probe installation, ambient air monitoring will be performed consistent with the May 2013 SSIWP. This monitoring will include Total Volatile Organic Compounds (TVOCs) and particulate dust in both the worker breathing zone and the work zone perimeter. The air monitoring data will be posted on the National Grid website and the site bulletin boards on a weekly basis. It is currently anticipated that the probes will be sampled during the week of July 22, 2013.

Please contact me at 401-421-4140 Ext. 2719 if you have any questions or comments.
