SITE ACTIVITIES TO BE PERFORMED

- No site activities are planned for the week of March 3 to 7, 2014.
- Complete bimonthly Site observation walk during week of March 10 to 14, 2014.
- Perform drilling activities related to the limited soil and groundwater investigation program within the natural gas regulator station. These investigations are designed to further evaluate results of the soil gas testing recently performed near the natural gas regulator station. We currently expect drilling activities will be initiated on or about March 10, 2014, depending on weather and snow cover and will take 2 to 3 days to complete. A public notification regarding the proposed investigation was distributed on February 21, 2014.

National Grid is hosting a public meeting to present the results of the recently completed soil gas testing at the Tidewater Site. In addition to National Grid, representatives of RIDEM and EPA will attend. The meeting is scheduled for March 6, 2014 from 6:30 to 7:30 PM at the Francis J. Varieur Elementary School. The end of the meeting will be extended if necessary to answer any questions. A public notification was sent out to the Tidewater mailing list on February 11, 2014.

Please contact me at 401-421-4140 Ext. 2719 if you have any questions or comments.
