STAGE I means a "stationary storage vessel that is equipped with a submerged fill pipe, and the vapors displaced from the storage vessel during filling are processed by a vapor control system. The vapor control system shall include a vapor-tight line from the storage vessel to the delivery vessel and a system that will ensure that vapors will be transferred from the storage vessel to the delivery vessel."

STAGE II vapor collection and control system means a "system which collects gasoline vapors displaced from motor vehicle gasoline tanks during refueling and which routes the vapors to a stationary storage tank."

For purposes of estimating VOC emissions, gallons reported as "received" will be assumed to be the approximate number of gallons "thruput."

Gasoline Received (gal.)
