

CITIES AND TOWNS – LARVICIDE APPLICATION CHECKLIST FOR EEE ERP

- Each municipality must submit an application to the DEM Division of Agriculture and Resource Marketing (DAG) outlining the intended activity. Generally this application will include listing who will make the application, the proper pesticide category certification and certification numbers, the location of the application, a brief description of the application activity, as well as the name, manufacturer, application rate, and EPA registration number of the material. (Only mosquito habitat with the potential for larval production can be treated with a Bacillus larvicide.)
- Prior to, and immediately following each application, file with the DAG a report appropriately outlining the intended activity as well as the results of the application. Include, among other things, the time, area, and amount of material that was applied. List specifics of each application type in the appropriate section.
- Contact affected property owners.
- Notify the DAG of the start date and time of the application by calling 222-2781 ext. 4509.
- Notify the news media prior to the initiation of the larviciding program. Supply news media with the same information regarding the treatment program as is supplied to the residents, including the name and telephone number of the Larvicide Program Contact Person for the city or town.
- The following news media **MUST** be contacted by the city or town at the inception of the program, though not each and every day that larvicide is applied:
 - All local radio stations
 - Channel 10 Phone: 401-455-9105 Fax: 401-455-9140
 - Channel 12 Phone: 401-438-3310 Fax: 401-431-1012
 - Channel 6 Phone: 401-453-8044 Fax: 401-331-4431
- Contact the local police department prior to the initiation of the larvicide program.
- Submit the daily report form, including information on the larviciding program, via Fax to DAG no later than 9:00 AM following the day of application.
