

RECORD OF TELEPHONE CALL

On November 27, 2001 I telephoned Cindy Lewis of Beveridge and Diamond in response to her recent letter to John Langlois and myself about the Boliden Metech site on Allens Avenue in Providence. The letter was dated November 19, 2001 and received by RIDEM on November 21, 2001.

I informed her during the call that John had looked at Metech's proposed changes to the ELUR boilerplate and had some questions and concerns about some of the changes, and that he and I were going to meet about them. I also reminded her that it was made clear from the beginning that changes to the boilerplate would result in what might seem like an inordinate amount of review time. She agreed and reminded me that we knew from the beginning that they would keep asking us about the review status.
