Notification to Abutters
Site Investigation
Metech International, Inc.
434 Allens Avenue, Providence, Rhode Island
September 3, 2002

In accordance with the Rhode Island Department of Environmental Management's (RIDEM's) Rules and Regulations for the Investigation and Remediation of Hazardous Material Releases (the Remediation Regulations), Metech International, Inc. is providing notice to abutters that a Site investigation for the above mentioned property has been completed. The property is further designated as Plat 55, Lot 10 and Plat 47, Lot 601 of the City of Providence Tax Assessor's plat maps. The goal of the investigation was to determine the extent to which any historical activities at the property may have resulted in any exceedences of the RIDEM's promulgated soil criteria and groundwater objectives. The investigation involved sampling and analysis of groundwater and submission and review of the report of remediation previously undertaken at the site to replace PCB-contaminated soil with clean fill. The results of the investigation indicate that the clean fill and vegetative cover at the site provide adequate protection against exposure to any contaminants that may be present in soil in excess of RIDEM soil criteria. The proposed remedial alternative for the property is the execution of an Environmental Land Use Restriction that includes prohibition of residential use of the site and disturbance of the soil or vegetative cover at the site without prior written RIDEM approval. The future use of the property will be for commercial or industrial purposes. RIDEM has determined that the investigation has adequately assessed the nature and extent of the contamination at the property and addressed all concerns in accordance with the Remediation Regulations.

There is a 14-day comment period, commencing with the date of delivery of this notice, during which the public may review RIDEM records pertaining to this property and submit written comments regarding the technical feasibility of the preferred remedial alternative. Should you require additional time for review, a request for an extension of the comment period may be made to the Department. Requests must be received by the Department before 4:30 p.m. on the final day of the comment period, and may be made in writing to the address below or by calling the telephone number listed below. RIDEM will consider all substantive written comments prior to issuing its final approval of the proposed remedial alternative.

Written comments should be submitted to:

Margaret Dein Bradley, C.P.G.
R.I. Department of Environmental Management
Office of Waste Management
235 Promenade Street
Providence, RI 02908-5767

Arrangements to review RIDEM records may be made by calling 222-2797, ext. 7105.
