| Transfer Number | Emissions Points | Amount Transferred (tons) |
|-----------------|------------------|---------------------------|
|                 |                  |                           |
|                 |                  |                           |
|                 |                  |                           |
|                 |                  |                           |
|                 |                  |                           |
|                 |                  |                           |
|                 |                  |                           |
|                 |                  |                           |
|                 |                  |                           |
|                 |                  |                           |

Emissions points listed below are from your permit. Please provide annual tons processed at each transfer point.

**Transfer No. 1** Pneumatic loading from ship to a warehouse compartment A or warehouse compartment B. The dust collectors are Emissions Point 1(EP1) and Emissions Point 2 (EP2)

**Transfer point No. 2** is front-end loader operations moving material in the warehouse controlled by EP1 and EP2 above.

**Transfer Point No. 3** is the front end loader drop to reclaim hopper controlled by dust collector Emissions Point 3 (EP3).

**Transfer Point No. 4** is pneumatic loading from the reclaim hopper to the loadout tanks controlled by dust collector Emissions Point 4 (EP4)

**Transfer Point No. 5** is gravity transfer from the loadout tanks to trucks controlled by dust collector Emissions Point 5 (EP5)

**Transfer Point No 6** gravity transfer from loadout tank to trucks (lane 2)(EP6)

Transfer Point No 7 pneumatic transfer from Dome to Transfer Pump feeding silo (EP7)

Transfer Point No 8 pneumatic transfer from Ship to Dome (EP8)

Transfer Point No 9 pneumatic transfer from Transfer pump to Bin#3 (EP9)

Transfer Point 10 transfer to Bin#4 NA
