SAGE Project No. L5247468/M1266***

Dear Joe,

As discussed, SAGE Environmental, Inc. (SAGE) understands that the Department approves of the planned excavation of soils from three areas at the referenced property having arsenic concentrations exceeding the 19 ppm criteria. Excavation of these areas is currently planned to begin next Tuesday and will likely take 1-2 days to complete. This work will be performed utilizing the Department's "Dig and Haul" Policy.

Also as requested, supplemental soil testing for TPHs (total petroleum hydrocarbons) and PAHs (polyaromatic hydrocarbons) will be performed to round out the assessment of the property. We anticipate collecting these samples next week.

Thank you again for your assistance.

Sincerely,
SAGE Environmental, Inc.

Matthew Gallup
Environmental Scientist

Rick Mandile
Senior Principal
