2021 Air Pollution Inventory

Aggregate Storage Piles

\_\_\_\_\_  
Facility Name

\_\_\_\_\_  
Signature of Person Completing Form

\_\_\_\_\_  
Date

The amount of material processed per year by each process should be listed on this form. If your facility does not have a process, mark that process NA. One form should be filled for each storage pile.

Type of material (aggregate) processed: \_\_\_\_\_

Process		Tons of material processed per year	
Truck/ship Unloading Material			
Truck Loading Material			
	Number of Transfer Points within the Facility	Tons of material processed per year	
Transfer points (uncontrolled)			
Transfer points (controlled)			

Are the aggregate materials stored outside?                      Yes                      No

If Yes, answer the next three questions:

What is the surface area of the storage pile? \_\_\_\_\_(acres)

How long were the materials stored outside? \_\_\_\_\_(days)

Is the storage pile controlled?    Yes                      No

If Yes, by what method?              Wet suppression              Partial enclosure              Other:\_\_\_\_\_
