Subject: Springfield Street School

Jeff,

We observed carbon dust being emitted from the stack of the blower in the rear shed at the Middle school. After inspecting the unit and consulting with Service Tech, who supplied the carbon for the unit, we believe that some of the activated carbon pellets have disintegrated to a fine dust, probably due to vibrations. We are planning to replace the carbon in the two carbon vessels on this blower on Tuesday, August 24, 2010 to correct this problem. We will also be cleaning up the carbon dust. Please let me know if you have any questions.

Thank you,
Donna
