Providence, RI 02908-5767

Subject: Quarterly Monitoring for Springfield Street School Complex, 50 Springfield Street, Providence, RI – March 2005 Monitoring Round

Dear Mr. Crawford:

Quarterly monitoring was conducted between March 29 and April 6, 2005 at the above referenced site. The monitoring was performed in accordance with the *Long-Term Operation and Maintenance Plan and Site Contingency Plan* (O&M Plan) contained in the *Remedial Action Work Plan* prepared by ATC dated April 2, 1999, revised May 3, 1999 and May 9, 1999. The *Remedial Action Work Plan* (RAWP) was approved by the Rhode Island Department of Environmental Management (RIDEM) in a letter dated June 4, 1999.

Results of monitoring are provided in the following sections and in the attachments.

## **SOIL COVER MONITORING**

LFR conducted a visual survey of the site for evidence of significant soil cover erosion, or for any areas where the orange snow fencing indicator barrier was visible. LFR did not observe any areas where the orange indicator barrier was visible during this monitoring event. We observed some areas where standing water was present as a result of rain events during and preceding the monitoring.

However, as noted in previous communication with RIDEM, we noted an area where holes had developed due to settling near the transformer behind the Middle school (see attached figure). These holes were repaired on April 14, 2005. Photographs of the holes before and after repair are provided in Attachment 5.

## **SUB-SLAB VENTILATION SYSTEM**

The sub-slab ventilation system was inspected by LFR during the quarterly monitoring on March 31, 2005. The system was operating upon arrival for the monitoring events.

Influent and effluent air from the two blowers at the elementary school and the two blowers at the middle school was monitored. Samples of influent and effluent gas were collected at

each location and screened for methane, carbon dioxide, carbon monoxide, hydrogen sulfide, and volatile organic compounds (VOC). Results are provided in Table 1.

Methane, carbon monoxide, and hydrogen sulfide concentrations in the subslab ventilation system samples were below the Action Levels during this monitoring event. Carbon dioxide concentrations were measured at 0.1% (1,000 ppm) at each location. PID readings ranged from 3.2 to 6.0 ppm. A notification that the 5 ppm Action Limit was exceeded has already been made. The PID readings rose slowly then stabilized as air was extracted from a Tedlar bag, and the maximum reading was recorded. The slow rise was similar to the reaction the PID sometimes has to moisture in a sample. No odors or unusual conditions were observed.

PID readings above the Action Level were detected during the December 2004 monitoring event. In response, samples were collected in Tedlar bags and submitted to the laboratory for analysis by EPA method TO14, and arrangements were made to change the carbon in the carbon vessels. Service Tech, Inc. was contracted by the Providence School Department to remove and replace all of the activated carbon in the subslab ventilation systems. This work was completed in February 2005. Subslab ventilation system monitoring conducted in January 2005 and February 2005 (after carbon replacement), found PID readings below the Action Limits (see Table 2).

Air samples were collected on December 13, 2004. Results of analysis detected only low levels of compounds similar to those detected in soil gas samples. These results were submitted to RIDEM previously, and a table summarizing the results is attached as Table 3.

The PID is a non-specific instrument that responds to many different compounds. Compounds which can be detected by the PID include aromatics, ketones, aldehydes, amines, amides, chlorinated hydrocarbons, sulfur compounds, unsaturated hydrocarbons, alcohols, saturated hydrocarbons, ammonia, hydrogen sulfide, nitric oxide, bromine, and iodine. Under some circumstances elevated readings can also be caused by water vapor. Many of these compounds have very low odor thresholds, which would be noticed during the monitoring if they were present.

In response to the exceedance of the Action Level, we will perform PID monitoring of the subslab ventilation systems on a monthly basis during the next quarter.

## **INDOOR AIR MONITORING**

Indoor air monitoring was conducted on using a Landtec Gem 2000 landfill gas monitor, a VRAE multigas meter, and a Mini Rae photoionization detector (PID). Results of monitoring are provided in the Table 4. No parameters were detected at concentrations above the action levels specified in the Remedial Action Work Plan during this round of monitoring.

The methane monitors at the middle school were being calibrated by Diamond Calibration personnel on March 31, 2005 when the monitoring was being performed. All of the sensors were functioning at the time of our inspection.

## **GROUNDWATER MONITORING**

Five groundwater monitoring wells were sampled by LFR on April 6, 2005. Prior to sampling, the depth to water was gauged, and a volume of water equivalent to approximately three well volumes was removed from each well. Temperature, specific conductance, dissolved oxygen, and pH were measured in the field prior to sampling. Depth to groundwater ranged between 10.02 and 15.86 feet below the ground surface. Groundwater samples were collected in laboratory prepared sample jars and delivered under chain-of-custody protocol to Contest Laboratory in East Longmeadow, Massachusetts for analysis for volatile organic compounds by EPA method 8260. Groundwater sampling logs are provided as Attachment 1, and the laboratory report is provided as Attachment 2. Results of analysis of groundwater samples are summarized in Table 5.

No target analytes were detected in samples from wells ATC-2, ATC-3, ATC-4 or ATC-5. Trichloroethylene was detected in the groundwater sample from monitoring well ATC-1. The concentration of trichloroethylene detected,  $1.1 \mu\text{g/L}$ , was well below the RIDEM GB objective of  $540 \mu\text{g/L}$ .

## **SOIL GAS MONITORING**

Soil gas monitoring was conducted at 29 locations on March 29, 2005. The sampling was conducted by placing an air sampling gripper cap on each well and attaching a piece of tubing. A volume of air equivalent to approximately 3 well volumes was removed from each well using an SKC Aircheck Sampling pump. Soil gas was then screened using a Landtec Gem 2000 Landfill Gas Analyzer, a VRAE Multigas Monitor, and a MiniRae Photoionization Detector.

Air samples were also collected in new laboratory supplied Tedlar bags using the SKC Aircheck Pump from wells WB-2 and MPL-2. The Tedlar bags were submitted to Con-test Analytical Laboratory for analysis for VOC via EPA method TO-14.

### ***Soil Gas Field Monitoring Results***

Soil gas samples were screened for methane, carbon monoxide, hydrogen sulfide, carbon dioxide, oxygen, and total VOCs. Soil gas survey results are provided in Table 6.

Methane readings were 0 or 0.1 % methane at all locations during the monitoring event. All locations were below the Action Level of 0.5%.

All PID readings for total VOCs were zero. All measurements for carbon monoxide and hydrogen sulfide were 0.

Carbon dioxide was detected at 21 locations with detectable concentrations ranging from 0% to 3.1% during the March 29, 2005 monitoring event. The carbon dioxide Action Level is 0.1%, and 15 readings exceeded the action level. The presence of carbon dioxide in soil gas is an indicator of subsurface bacterial activity and does not represent a threat to users of the property. Graphs presenting carbon dioxide, oxygen, and methane concentrations over time for seven representative wells are presented in Attachment 3.

### ***Soil Gas Laboratory Results***

In accordance with the O&M Plan, two soil gas samples were collected in Tedlar bags and submitted to Con-Test Analytical Laboratories for analysis by method TO-14. Results of the analysis are summarized in Table 7, and the laboratory report is provided in Attachment 4. Several compounds were detected at low concentrations. The results were typical of the concentrations and compounds which have been detected in previous monitoring events.

The Occupational Safety and Health Administration (OSHA) Permissible Exposure Limits (PELs) are provided in Table 7 for comparison purposes even though they are not applicable to soil gas, because it does not represent exposure point concentrations. The PELs are the average concentrations that OSHA allows to be present in a workplace without any respiratory protection or exposure controls. The concentrations detected in soil gas were well below the OSHA PELs.

### **CONCLUSIONS**

Methane, carbon monoxide, and hydrogen sulfide concentrations did not exceed action levels in any soil gas samples, indoor air or subslab ventilation system samples. Carbon dioxide concentrations in soil gas exceeded the action level at some locations.

Monitoring at the inlet and outlet of the sub-slab ventilation system detected PID readings slightly above the Action Level (maximum of 6.0 compared to Action Level of 5.0 ppm) at the elementary school. No odors or other indicators of the presence of unusual conditions was detected. Elevated PID readings were not detected in the Site buildings or in the soil gas monitoring wells. In response to the PID reading above the Action Level, the subslab ventilation system inlet and outlet air streams will be monitored via the PID on a monthly basis during the next quarter.

The carbon in all six 2,000 pound carbon vessels was replaced with new carbon during this quarter.

Site Address: Springfield Street  
Providence, RI

Sampled By: A. Cote	Date: 4/6/05
Weather: partly cloudy ~ 60°F	Purging Equipment: dedicated polyethylene bailer
Sampling Equipment: dedicated polyethylene bailer	Decontamination method:
Measuring Point (top of PVC/ top of casing): PVC	Depth to water: 11.57 (feet)
Casing diameter: 2 inch (inches)	Flush mount or riser:
Depth to Product: ND (feet)	Product thickness: NA (feet)
Depth to bottom: 20.78 (feet)	Length of Water Column (depth to bottom – depth to water): 9.21 (feet)
Well measuring point elevation: (feet)	Water table elevation: (feet)
Well volume: 5.7 (liters)	Three well volumes: (1.85 x length of water column for 2 inch well): 17 (liters)

## FIELD MEASUREMENT DATA

Volume Removed (liters)	Temperature (°C)	Specific Conductance (μS/cm)	Dissolved Oxygen (mg/L)	pH (standard units)
14	14.5	0.0	0.62	5.33
15	13.1	2.1	0.96	5.32
16	13.4	5.0	0.95	5.30

Total volume Removed: 17

## OBSERVATIONS:

Color of groundwater: Clear Odors: Yes Did well go dry: No

Well Number: ATC-2

Site Name: Springfield Street School

REPORT DATE 4/12/2005

LEVINE FRICKE  
250 CENTERVILLE RD., BLDG. E, SUITE 12  
WARWICK, RI 02886  
ATTN: DONNA PALLISTER

CONTRACT NUMBER:  
PURCHASE ORDER NUMBER: 5131

PROJECT NUMBER:

#### ANALYTICAL SUMMARY

LIMS BAT #: LIMS-87387  
JOB NUMBER: 081-12152-01

The results of analyses performed on the following samples submitted to the CON-TEST Analytical Laboratory are found in this report.

PROJECT LOCATION: SPRINGFIELD STREET SCHOOL

FIELD SAMPLE #	LAB ID	MATRIX	SAMPLE DESCRIPTION	TEST
ATC-1	05B12108	GRND WATER	NOT SPECIFIED	8260 water
ATC-2	05B12109	GRND WATER	NOT SPECIFIED	8260 water
ATC-3	05B12110	GRND WATER	NOT SPECIFIED	8260 water
ATC-4	05B12111	GRND WATER	NOT SPECIFIED	8260 water
ATC-5	05B12112	GRND WATER	NOT SPECIFIED	8260 water
TRIP BLANK	05B12113	WATER OTHE	NOT SPECIFIED	8260 water

The CON-TEST Environmental Laboratory operates under the following certifications and accreditations :

AIHA 100033	AIHA ELLAP (LEAD) 100033	
MASSACHUSETTS MA0100	NEW HAMPSHIRE NELAP 2516	NEW JERSEY NELAP NJ MA007 (AIR)
CONNECTICUT PH-0567	VERMONT DOH (LEAD) No. LL015036	ARIZONA AZ0648
NEW YORK ELAP/NELAP 10899	RHODE ISLAND (LIC. No. 112)	ARIZONA AZ0654 (AIR)

I certify that the analyses listed above, unless specifically listed as subcontracted, if any, were performed under my direction according to the approved methodologies listed in this document, and that based upon my inquiry of those individuals immediately responsible for obtaining the information, the material contained in this report is, to the best of my knowledge and belief, accurate and complete.

#### NOTES:

QC Batch No. : GCMS/VOL-11800

Sample ID : LFBLANK-40594

Analysis : 2,2-Dichloropropane

THIS COMPOUND IS CLASSIFIED AS A "DIFFICULT ANALYTE" IN METHOD SW846 8260  
AND CONTROL LIMITS OF 50-155% ARE USED FOR THE LABORATORY FORTIFIED BLANK  
RECOVERY.

#### QUALITY CONTROL DEFINITIONS AND ABBREVIATIONS

##### QC BATCH NUMBER

This is the number assigned to all samples analyzed together that would be subject to comparison with a particular set of Quality Control Data.

##### LIMITS

Upper and Lower Control Limits for the QC ANALYSIS Reported. All values normally would fall within these statistically determined limits, unless there is an unusual circumstance that would be documented in a NOTE appearing on the last page of the QC SUMMARY REPORT. Not all QC results will have Limits defined.

##### Sample Amount

Amount of analyte found in a sample.

##### Blank

Method Blank that has been taken though all the steps of the analysis.

##### LFBLANK

Laboratory Fortified Blank (a control sample)

##### STDADD

Standard Added (a laboratory control sample)

##### Matrix Spk Amt Added

Amount of analyte spiked into a sample  
Amount of analyte found including amount that was spiked  
% Recovery of spiked amount in sample.

##### Duplicate Value Duplicate RPD

The result from the Duplicate analysis of the sample.  
The Relative Percent Difference between two Duplicate Analyses.

##### Surrogate Recovery

The % Recovery for non-environmental compounds (surrogates) spiked into samples to determine the performance of the analytical methods.

##### Sur. Recovery (ELCD) Sur. Recovery (PID)

Surrogate Recovery on the Electrolytic Conductivity Detector.  
Surrogate Recovery on the Photoionization Detector.

##### Standard Measured Standard Amt Added Standard % Recovery

Amount measured for a laboratory control sample  
Known value for a laboratory control sample  
% recovered for a laboratory control sample with a known value.

##### Lab Fort Blank Amt Lab Fort Blk. Found Lab Fort Blk % Rec Dup Lab Fort Bl Amt Dup Lab Fort Bl Fnd Dup Lab Fort Bl % Rec Lab Fort Blank Range

Laboratory Fortified Blank Amount Added  
Laboratory Fortified Blank Amount Found  
Laboratory Fortified Blank % Recovered  
Duplicate Laboratory Fortified Blank Amount Added  
Duplicate Laboratory Fortified Blank Amount Found  
Duplicate Laboratory Fortified Blank % Recovery  
Laboratory Fortified Blank Range (Absolute value of difference between recoveries for Lab Fortified Blank and Lab Fortified Blank Duplicate).

##### Lab Fort Bl. Av. Rec.

Laboratory Fortified Blank Average Recovery

##### Duplicate Sample Amt MSD Amount Added MSD Amt Measured MSD % Recovery MSD Range

Sample Value for Duplicate used with Matrix Spike Duplicate  
Matrix Spike Duplicate Amount Added (Spiked)  
Matrix Spike Duplicate Amount Measured  
Matrix Spike Duplicate % Recovery  
Absolute difference between Matrix Spike and Matrix Spike Duplicate Recoveries

PROJECT NUMBER:

#### ANALYTICAL SUMMARY

LIMS BAT #: LIMS-87125  
JOB NUMBER: 081-12152-01

The results of analyses performed on the following samples submitted to the CON-TEST Analytical Laboratory are found in this report.

PROJECT LOCATION: SPRINGFIELD ST. SCHOOL, PROVIDENCE, RI.

FIELD SAMPLE #	LAB ID	MATRIX	SAMPLE DESCRIPTION	TEST
MPL-2	05B10961	AIR	NOT SPECIFIED	to-14 ppbv
MPL-2	05B10961	AIR	NOT SPECIFIED	to-14 ug/m3
WB-2	05B10960	AIR	NOT SPECIFIED	to-14 ppbv
WB-2	05B10960	AIR	NOT SPECIFIED	to-14 ug/m3

The CON-TEST Environmental Laboratory operates under the following certifications and accreditations :

AIHA 100033	AIHA ELLAP (LEAD) 100033	
MASSACHUSETTS MA0100	NEW HAMPSHIRE NELAP 2516	NEW JERSEY NELAP NJ MA007 (AIR)
CONNECTICUT PH-0567	VERMONT DOH (LEAD) No. LL015036	ARIZONA AZ0648
NEW YORK ELAP/NELAP 10899	RHODE ISLAND (LIC. No. 112)	ARIZONA AZ0654 (AIR)

I certify that the analyses listed above, unless specifically listed as subcontracted, if any, were performed under my direction according to the approved methodologies listed in this document, and that based upon my inquiry of those individuals immediately responsible for obtaining the information, the material contained in this report is, to the best of my knowledge and belief, accurate and complete.

### QUALITY CONTROL DEFINITIONS AND ABBREVIATIONS

QC BATCH NUMBER

This is the number assigned to all samples analyzed together that would be subject to comparison with a particular set of Quality Control Data.

LIMITS

Upper and Lower Control Limits for the QC ANALYSIS Reported. All values normally would fall within these statistically determined limits, unless there is an unusual circumstance that would be documented in a NOTE appearing on the last page of the QC SUMMARY REPORT. Not all QC results will have Limits defined.

Sample Amount

Amount of analyte found in a sample.

Blank

Method Blank that has been taken though all the steps of the analysis.

LFBLANK

Laboratory Fortified Blank (a control sample)

STDADD

Standard Added (a laboratory control sample)

Matrix Spk Amt Added  
MS Amt Measured  
Matrix Spike % Rec.

Amount of analyte spiked into a sample  
Amount of analyte found including amount that was spiked  
% Recovery of spiked amount in sample.

Duplicate Value  
Duplicate RPD

The result from the Duplicate analysis of the sample.  
The Relative Percent Difference between two Duplicate Analyses.

Surrogate Recovery

The % Recovery for non-environmental compounds (surrogates) spiked into samples to determine the performance of the analytical methods.

Sur. Recovery (ELCD)  
Sur. Recovery (PID)

Surrogate Recovery on the Electrolytic Conductivity Detector.  
Surrogate Recovery on the Photoionization Detector.

Standard Measured  
Standard Amt Added  
Standard % Recovery

Amount measured for a laboratory control sample  
Known value for a laboratory control sample  
% recovered for a laboratory control sample with a known value.

Lab Fort Blank Amt  
Lab Fort Blk. Found  
Lab Fort Blk % Rec  
Dup Lab Fort Bl Amt  
Dup Lab Fort Bl Fnd  
Dup Lab Fort Bl % Rec  
Lab Fort Blank Range

Laboratory Fortified Blank Amount Added  
Laboratory Fortified Blank Amount Found  
Laboratory Fortified Blank % Recovered  
Duplicate Laboratory Fortified Blank Amount Added  
Duplicate Laboratory Fortified Blank Amount Found  
Duplicate Laboratory Fortified Blank % Recovery  
Laboratory Fortified Blank Range (Absolute value of difference between recoveries for Lab Fortified Blank and Lab Fortified Blank Duplicate).

Laboratory Fortified Blank Average Recovery

Lab Fort Bl. Av. Rec.  
  
Duplicate Sample Amt  
MSD Amount Added  
MSD Amt Measured  
MSD % Recovery  
MSD Range

Sample Value for Duplicate used with Matrix Spike Duplicate  
Matrix Spike Duplicate Amount Added (Spiked)  
Matrix Spike Duplicate Amount Measured  
Matrix Spike Duplicate % Recovery  
Absolute difference between Matrix Spike and Matrix Spike Duplicate Recoveries
